

‘Workshop on making of Eco-friendly Ganpati Idol’

The Ganesh festival is one of the biggest festivals in Mumbai. These idols are made up of non-biodegradable materials like plaster of Paris (PoP) and synthetic paints used are also a major source of contamination and sedimentation. After the festival the Ganesha idols are immersed at the various beaches and lakes and creeks across the Mumbai city. This can pose a serious threat to water quality and the flora and fauna. Considering this big issues, the Department of Lifelong Learning and Extension Unit initiated a very important activity before the festival began. A workshop on ‘Making of Eco friendly Ganpati Idol’ was conducted on 26 August 2022 in association with Entrepreneurship Development Cell and IQAC at 10.30 am in Room No 101. Mrs. Vidya Angolkar, fevicryl, expert teacher from Pidilite Company was the resource person. Madam was made Ganpati idol with using of mould it clays and also beautiful decorative materials by using of tented paper. As we informed to students about the workshop earlier, they were also brought the materials and made Ganesha Idol and decorative torans. Total 111 students were participated in the workshop along with 4 teachers.

Objective: To protect environment through organizing workshop and create awareness among the students about consequences of using Plaster of Paris and synthetic paints.

Outcome: The student pledged to use eco-friendly materials to make Ganpati idol and also purchased only those which made by using eco-friendly materials.

Report on Workshop on 'Home Made Compost Pit'

Composting of organic waste is relatively easy. Composting can manage most organic waste in the waste stream, including restaurant waste, leaves and yard wastes, farm waste, vegetables waste, etc. It can be easily incorporated into any waste management plan so, Department of Lifelong Learning and Extension Unit determined to conduct one practical demo session for the students to understand what is composting organic waste and how to make it. The very renowned personality Ms. Rashmi Joshi, Environmental Consultant, called for the session as a resource person. Madam, brought bacterial culture along with her and also required materials to demonstrate. Students actively participated in the activity and also taken bacterial culture from madam to make a homemade compost pit. A very important project i.e. Homemade compost pit was undertaken under DLLE in association with Entrepreneurship Development Cell on 25th April 2023

Objective: To understand the composting of organic waste and also use best out of waste.

Outcome: Students took bacterial culture to complete project given for making homemade compost pit
