### **Institutional Policy**

#### **Initiatives to Promote Environmental Conservation Beyond the Campus**

The policy aims to foster the active involvement of students, faculty members, and all stakeholders in promoting and participating in activities that conserve the environment. The institution should go beyond classroom awareness and sensitization programs and extend its efforts to the surrounding areas outside the campus, engaging in environmental conservation activities. All stakeholders of the institution are encouraged to initiate the following actions:

1. To associate local community in all programmes related to conservation of environment and educate and sensitize them towards this issue.
2. Support students' engagement in community work and encourage collaboration with NGOs, government agencies, and other relevant organizations.
3. Promote green initiatives and project work that can have a positive impact on society.
4. Organize tree plantation drives, waste management campaigns like anti-plastic drive, e-waste drives, noise pollution and awareness programs on sustainable development.
5. Sensitize students about the importance of renewable energy and encourage them to educate people on use of solar energy, electric vehicles, rainwater harvesting, and waste management.
6. Motivate students and stakeholders to incorporate environmental conservation initiatives into their daily lives, such as using public transportation to reduce pollution, practising proper waste segregation, and promoting the reduction, reuse, and recycling of resources like paper and clothing.
